DIARY NOTES

A-DD/S

8 March 1966

25X1A
25X1A

1. [REDACTED] called to say how pleased he was with the performance of [REDACTED] over the past 18 months and that he will send a memorandum saying so for the file. Initially he is very pleased with [REDACTED] Brad's replacement and felt constrained to report this since this is one of the early efforts to put support people in DD/I offices. I thanked him and said that it was very thoughtful for him to call. 25X1A

2. At the Morning Meeting, the Director said he was not satisfied that our intelligence had sufficient medical input. Dr. Wheelon pointed out that he had medical officers in OSI who are responsible for making medical evaluations on intelligence problems and that he also had [REDACTED] R&D. The Director said that he recognized this but he still felt more medical input was indicated. No action was assigned. I reported this, however, to Dr. Tietjen and he said that he has heard this on several occasions recently and wondered what he should do. I made an appointment for him to see Col. White tomorrow to discuss this. 25X1A

4. Circulated an appropriation request for clearing space at the [REDACTED] this in lieu of an ExCom meeting which I cancelled. 25X1A

5. At the Morning Meeting, [REDACTED] reported on the good prospects for getting FECA limitations raised from \$525 per month to 2/3rds of the top of a GS-15 which will roughly be about \$1300 per month. 25X1A

*6. The Director at the Morning meeting said that he wanted to push on getting congressmen on the committees out to be briefed at NPIC. He said this was necessary if we are going to get a new building, and then expressed some ideas on what the new building should be. He wants the new building designed in order that it can be added onto at a later date. Col. White explained that this is not generally satisfactory because building with all the construction dust is disruptive to NPIC's work. The Director noted this. I am to brief Col. White on what our preliminary thinking is on the additional NPIC construction at an early date. I would like the Office of Logistics to tell me where we stand in planning for NPIC as of now.
